Doctor Tells How to Shed Bad Complexion

We cannot restore degenerated facial tissue any more than we can restore a lost limb. It is useless to attempt to convert a worn-out complexion into a new one. The rational procedure is to remove the complexion instead—remove the devitalized cuticle. Not by surgical means, however, as the underlying cutie is too thin, too tender, to withstand immediate exposure. Applying ordinary mercolized wax will gradually absorb the offending cuticle. By degrees, a new youthful skin appears: soft and delicately tinted as a rose petal.

soft and delicately tinted as a rose petal.

No lady need hesitate to try this, Procure an ounce of mercolized wax of the druggist. Spread on a thin layer before retiring, removing this in the morning with soap and water. In from one to two weeks the complexion is completely transformed.

An approved treatment for wrinkles is provided by dissolving an ounce of powdered saxolite in a half pint of witch hazel. Bathing the face in the solution brings prompt and remarkable results—Dr. R. Mackenzie in Papular Medicine.
